Caio Barbieri

Senior DevOps Engineer

Campinas, São Paulo, Brazil • +55 (19) 99753-6692 • caio@lombello.com • LinkedIn • GitHub

ABOUT

Senior DevOps Engineer and SRE with hands-on experience designing and operating AWS platforms for critical environments. I build and evolve solutions with Kubernetes/EKS, ECS, Terraform, CloudFormation and GitOps across multi-account networking, observability, security and incident response. My work includes migrations, IAM and network hardening, resilient architecture design and operational automation. I use Python, Go and AI as supporting tools to reduce manual work and accelerate technical decisions.

PROFESSIONAL EXPERIENCE

SRE | Cloud Engineer — Opsteam

Aug 2025 – Present

- Provide hands-on SRE and Cloud consulting across multiple clients, operating and evolving business-critical AWS environments with a focus on reliability, security and operational continuity.
- Design and implement multi-account and hub-and-spoke architectures spanning IPAM, VPC, Transit Gateway, peering, DNS and ALB/NLB ingress layers, codified with Terraform and CloudFormation.
- Deliver migrations and modernization across ECS, EKS/Kubernetes and data platforms such as RDS, Redis/Valkey, OpenSearch and MongoDB, using GitOps, Argo CD and Helm.
- Respond to production incidents and complex failures using metrics, logs and event evidence, restoring services through controlled recovery, rollback and validation tests.
- Strengthen cloud security and governance through least-privilege IAM, WAF, Network Firewall, Vault, CSPM/CIS assessments and credential rotation.
- Produce architecture decisions, sizing and cost estimates for highly available scenarios, and build internal tooling and AI-assisted workflows.

Senior DevOps Analyst — Vertigo Tecnologia

Jun 2025 – Aug 2025

- Responsible for architecting and delivering the entire platform engineering foundation for an enterprise client.
- Created reusable templates and modules with IaC, DevSecOps pipelines using ArgoCD, integration with Keycloak and Backstage, and deployed a centralized, multi-cluster observability stack.
- Managed Kubernetes environments across multiple clouds (AWS and Oracle Cloud), ensuring secure, scalable, and standardized operations.
- Technically led the project, executing all implementations hands-on.

Mid-level DevOps Analyst — Vertigo Tecnologia

Sep 2024 – Jul 2025

- Developed infrastructure automation solutions and CI/CD pipelines for various clients.
- Led AI-based automation initiatives and actively contributed to the VeeCode platform by creating templates, plugins, and custom features.
- Implemented observability solutions and provided ongoing DevOps consulting to support digital transformation and team enablement.

Junior DevOps Analyst — Vertigo Tecnologia

Oct 2022 – Sep 2024

- Led Cloud Native cultural transformation initiatives, developed GitOps/DevSecOps pipelines with Bamboo and Shell Script, and implemented monitoring stacks with Grafana, Prometheus, Loki, and Alertmanager.
- Managed Redis, RabbitMQ, custom Helm Charts, Dockerfiles, and local clusters with K3d.
- Created Terraform automations and reinforced AWS security by applying the principle of least privilege.
- Also managed HashiCorp's Vault and Consul, ensuring security and resilience in secret and network management.

DevOps Intern — Vertigo Tecnologia

Feb 2022 – Oct 2022

- Implemented GitLab on a DigitalOcean cluster using Helm and Kubernetes.
- Automated the migration of over 200 repositories via Python and the GitLab API.
- Optimized Helm templates, CI/CD pipelines, and containerized applications to accelerate the development cycle.

SKILLS

Cloud/Infra: AWS, AWS Networking, AWS CloudFormation, Amazon EKS, Amazon ECS, Oracle Cloud, Kubernetes, Terraform, HashiCorp Consul

Containerization: Docker

CI/CD: GitOps, DevSecOps, Helm, ArgoCD

Languages: Python, Golang

Observability: Prometheus, Grafana, OpenTelemetry, Tempo, Loki, Thanos, Alertmanager

Security: HashiCorp Vault, IAM and Cloud Security, Keycloak

Tools: Backstage

Automation: LLMs

Others: Incident Response

EDUCATION

Bachelor in Information Systems — Universidade Estácio de Sá Mar 2022 – Dec 2025
